

STAT Based on a recommendation from EUCA, we have approved the  
STAT replacement of [ ] outdated manual fire alarm and automatic  
STAT fire detection systems. EUCA's recommendation was the result of  
STAT the system's local manufacturer's representative advising [ ]  
STAT Engineering of the uncertainty of available spare parts to main-  
STAT tain the system. Additionally, since [ ] is currently  
STAT installing an OC approved smoke detection/audible alerting system  
STAT in their shielded enclosure, this would be an opportune time to  
STAT upgrade [ ] overall fire detection/alerting capability.

*Safety report for  
Feb 83*

*SSA/BCS - Nothing significant*
